

OBJECTIVE

Having completed this One Day course, you should be confident in creating OLE reports within Excel. User will have gained familiarity with common OLE functions and understand how to apply them.

SKILLS

The course has been designed to cut out the jargon. Both experienced Excel users and relative beginners will all benefit from the course content.

STRUCTURE

LOCATION

We will come to your offices, this way we will be working on your system, with data that you understand and are already familiar with.

ATTENDEES

The training structure compliments both individual and group training. It doesn't matter if there is a mixture of skills in the team, the course goes at a suitable pace to suit all system users.
